

The **Bureau of Justice Assistance's (BJA) Comprehensive Opioid, Stimulant, and Substance Abuse Program (COSSAP) Training and Technical Assistance (TTA)** services support jurisdictions in need—including BJA and partner grantees, states, tribes, local communities, and the field at large—in building and sustaining multidisciplinary public safety and public health responses to substance use disorder (SUD). Expertise is available to meet the specific needs and goals of respective projects by supporting a wide range of strategies, including law enforcement and first responder diversion; overdose prevention; reentry and community corrections; peer recovery support services; cross-site coordination; rural and tribal planning and capacity building; services for children and families victimized by the crisis; prescription drug monitoring programs (PDMPs); treatment, including technology-assisted and medication-assisted treatment (MAT); technical solutions such as the Overdose Detection Mapping Application Program (ODMAP); and data-driven projects such as **overdose fatality reviews (OFRs)**. TTA is provided in a variety of formats, including expert consultations, virtual and in-person training events, workshop and meeting presentations, and online resources.

How to Request TTA

The **COSSAP TTA Program** offers a centralized online system for requesting all forms of TTA through the completion of a brief online application form (<https://cossapresources.org/Program/TTA>). BJA reviews each submission to match the request with the COSSAP TTA provider (or team of providers) with the appropriate expertise. The process is provided to requestors free of charge and is **not limited to COSSAP grantees**.

COSSAP TTA Providers

As COSSAP TTA providers, the following agencies look forward to supporting you, your team, and your project. **Select the respective organization's name for a video introduction** of the areas of expertise and services offered to help communities across America reverse the tide of SUDs and, in turn, promote public health, public safety, healing, and recovery.
